The AI Written RFP

Prepared by the Broadcastwell team

Team review: in progress. No criterion has completed the two analyst verification process.

The research in figures

Across fourteen categories we identify 2,003 distinct category criteria from 2,093 eligible source answers after the recorded study exclusions. The evidence contains 10,547 exact supporting answer spans, 2,417 explicit vendor association passages and 10,015 dated page comparisons across seventy mapped vendor pages.

The tables show the ten most frequently stated criteria in each category, ordered by distinct answer count and then criterion label. The full data includes every criterion and supporting record. Criteria are category specific; similarly worded criteria in different categories are not combined. Every criterion remains Team review: in progress.

Source and scope

Answers captured under method v1.1 on 22 to 23 Sep 2026 for the Absence Index release 2026-09 (DOI 10.5281/zenodo.22907695).

We examine the buying requirements stated before the first vendor in each eligible category answer from ChatGPT, Claude, Perplexity, Google AI Overviews and Google AI Mode. Each engine and question had three scheduled runs. We use the frozen September answers rather than a new model capture.

A criterion count is the number of distinct eligible answers that state that criterion in the eligible prefix. Multiple supporting passages in one answer count once. Its base is the eligible answer count for that category after the documented study exclusions. The reported interval is the Wilson 95 percent interval computed from that count and base. Repeated answers share prompts and conditions; these descriptive calculations are not guarantees about future answers or an independent sample of all buyers.

The repeat count shows how many of the three scheduled runs state a criterion for the named engine and question. It describes repetition in those captures. It is not a probability that a claim is correct.

Named vendors and dated pages

A vendor association requires an eligible prefix criterion and an explicit connection to that vendor in the same complete answer. A cited publisher, generic list, anonymous product, negative comparison or unsupported implication does not establish the association. Separate passages and repeated runs are counted under the published rules.

For each category we map the five vendors with the highest mention counts in the frozen Index release, breaking equal counts by name. The page comparisons refer only to the exact dated page identified in the data. A feature or requirement not stated on that page is not evidence that the product lacks it. A partial compound statement, unsuitable product scope, missing plan detail or unread page remains unknown.

We preserve the distinction between a named product and its parent company, product suite, optional module, plan, integration, hosting variant or testimonial. Vendor claims are page statements, not tested capabilities or outcome promises. Each vendor figure appears beside the corresponding median across the five mapped vendors in its category.

Construction project management software

Most frequently stated criteria

Answer base: 149. Complete category data: 92 criteria, 425 exact answer spans. Counts refer to distinct answers in the eligible prefix.

Criterion	Count/base and rate	Wilson 95 percent	Review
Fit with the buyer's construction workflows	17/149 (11.4%)	7.2% to 17.5%	Team review: in progress
Mobile access for field work	16/149 (10.7%)	6.7% to 16.7%	Team review: in progress
Job cost and budget tracking	14/149 (9.4%)	5.7% to 15.2%	Team review: in progress
Project and task scheduling	14/149 (9.4%)	5.7% to 15.2%	Team review: in progress
Drawing and document version control	13/149 (8.7%)	5.2% to 14.4%	Team review: in progress
Project communication and collaboration	12/149 (8.1%)	4.7% to 13.5%	Team review: in progress
Project document storage and management	11/149 (7.4%)	4.2% to 12.7%	Team review: in progress
Cost forecasting	10/149 (6.7%)	3.7% to 11.9%	Team review: in progress
Construction workflow tracking for RFIs, submittals and field reports	9/149 (6.0%)	3.2% to 11.1%	Team review: in progress
Total cost including implementation and related charges	9/149 (6.0%)	3.2% to 11.1%	Team review: in progress

The complete criteria and evidence tables identify each source answer, engine, question, run, capture date, exact offset and supporting hash. Repeated passages in an answer count once for a criterion.

CRM

Most frequently stated criteria

Answer base: 150. Complete category data: 119 criteria, 1027 exact answer spans. Counts refer to distinct answers in the eligible prefix.

Criterion	Count/base and rate	Wilson 95 percent	Review
Workflow automation	40/150 (26.7%)	20.2% to 34.3%	Team review: in progress
Fit with the buyer’s business or operating needs	36/150 (24.0%)	17.9% to 31.4%	Team review: in progress
Ease of use or adoption	31/150 (20.7%)	15.0% to 27.8%	Team review: in progress
Reports, dashboards or business analytics	29/150 (19.3%)	13.8% to 26.4%	Team review: in progress
Configuration to fit business processes	25/150 (16.7%)	11.6% to 23.4%	Team review: in progress
Deal and sales pipeline management	24/150 (16.0%)	11.0% to 22.7%	Team review: in progress
Connections with the buyer’s existing business tools	21/150 (14.0%)	9.3% to 20.5%	Team review: in progress
Sales and revenue forecasting	20/150 (13.3%)	8.8% to 19.7%	Team review: in progress
Capacity to support business growth	19/150 (12.7%)	8.3% to 18.9%	Team review: in progress
Cost appropriate to the buyer’s budget and scale	18/150 (12.0%)	7.7% to 18.2%	Team review: in progress

The complete criteria and evidence tables identify each source answer, engine, question, run, capture date, exact offset and supporting hash. Repeated passages in an answer count once for a criterion.

CRM

Dated vendor page comparisons

Base for each vendor: 119 category criteria. Each median is the corresponding count and rate across the same five mapped vendors, including zeros. Unknown includes partial or unsuitable product scope. Not stated means not stated on the dated page, never a missing product feature.

Vendor	Page state	Count/base and rate	Wilson 95 percent	Category median
HubSpot CRM	Stated	17/119 (14.3%)	9.1% to 21.7%	17/119 (14.3%)
HubSpot CRM	Not stated	74/119 (62.2%)	53.2% to 70.4%	72/119 (60.5%)
HubSpot CRM	Unknown	28/119 (23.5%)	16.8% to 31.9%	28/119 (23.5%)
Salesforce Sales Cloud	Stated	5/119 (4.2%)	1.8% to 9.5%	17/119 (14.3%)
Salesforce Sales Cloud	Not stated	64/119 (53.8%)	44.8% to 62.5%	72/119 (60.5%)
Salesforce Sales Cloud	Unknown	50/119 (42.0%)	33.5% to 51.0%	28/119 (23.5%)
Pipedrive	Stated	41/119 (34.5%)	26.5% to 43.4%	17/119 (14.3%)
Pipedrive	Not stated	54/119 (45.4%)	36.7% to 54.3%	72/119 (60.5%)
Pipedrive	Unknown	24/119 (20.2%)	13.9% to 28.3%	28/119 (23.5%)
Zoho CRM	Stated	2/119 (1.7%)	0.5% to 5.9%	17/119 (14.3%)
Zoho CRM	Not stated	87/119 (73.1%)	64.5% to 80.3%	72/119 (60.5%)
Zoho CRM	Unknown	30/119 (25.2%)	18.3% to 33.7%	28/119 (23.5%)
Microsoft Dynamics 365	Stated	20/119 (16.8%)	11.2% to 24.5%	17/119 (14.3%)
Microsoft Dynamics 365	Not stated	72/119 (60.5%)	51.5% to 68.8%	72/119 (60.5%)
Microsoft Dynamics 365	Unknown	27/119 (22.7%)	16.1% to 31.0%	28/119 (23.5%)

Team review: in progress. The full vendor page table preserves every page URL, actual read date, snapshot hash, evidence offset and scope note. Category medians summarize these five pages; they are not a quality benchmark.

Project management

Most frequently stated criteria

Answer base: 150. Complete category data: 137 criteria, 742 exact answer spans. Counts refer to distinct answers in the eligible prefix.

Criterion	Count/base and rate	Wilson 95 percent	Review
Fit with stated team needs or workflows	37/150 (24.7%)	18.5% to 32.1%	Team review: in progress
Scalability as needs grow	18/150 (12.0%)	7.7% to 18.2%	Team review: in progress
Reporting functionality	17/150 (11.3%)	7.2% to 17.4%	Team review: in progress
Ease of use and adoption	16/150 (10.7%)	6.7% to 16.6%	Team review: in progress
Full ownership costs including implementation and add ons	15/150 (10.0%)	6.2% to 15.8%	Team review: in progress
Working connections to existing business systems	15/150 (10.0%)	6.2% to 15.8%	Team review: in progress
Product or vendor security	14/150 (9.3%)	5.6% to 15.1%	Team review: in progress
Manageable complexity or administrative effort	12/150 (8.0%)	4.6% to 13.5%	Team review: in progress
Task dependencies	12/150 (8.0%)	4.6% to 13.5%	Team review: in progress
Applicable compliance requirements	11/150 (7.3%)	4.1% to 12.7%	Team review: in progress

The complete criteria and evidence tables identify each source answer, engine, question, run, capture date, exact offset and supporting hash. Repeated passages in an answer count once for a criterion.

Dated vendor page comparisons

Base for each vendor: 137 category criteria. Each median is the corresponding count and rate across the same five mapped vendors, including zeros. Unknown includes partial or unsuitable product scope. Not stated means not stated on the dated page, never a missing product feature.

Vendor	Page state	Count/base and rate	Wilson 95 percent	Category median
Asana	Stated	26/137 (19.0%)	13.3% to 26.4%	31/137 (22.6%)
Asana	Not stated	82/137 (59.9%)	51.5% to 67.7%	82/137 (59.9%)
Asana	Unknown	29/137 (21.2%)	15.2% to 28.7%	25/137 (18.2%)
ClickUp	Stated	35/137 (25.5%)	19.0% to 33.4%	31/137 (22.6%)
ClickUp	Not stated	74/137 (54.0%)	45.7% to 62.1%	82/137 (59.9%)
ClickUp	Unknown	28/137 (20.4%)	14.5% to 28.0%	25/137 (18.2%)
Jira	Stated	18/137 (13.1%)	8.5% to 19.8%	31/137 (22.6%)
Jira	Not stated	97/137 (70.8%)	62.7% to 77.8%	82/137 (59.9%)
Jira	Unknown	22/137 (16.1%)	10.9% to 23.1%	25/137 (18.2%)
Smartsheet	Stated	31/137 (22.6%)	16.4% to 30.3%	31/137 (22.6%)
Smartsheet	Not stated	83/137 (60.6%)	52.2% to 68.4%	82/137 (59.9%)
Smartsheet	Unknown	23/137 (16.8%)	11.5% to 23.9%	25/137 (18.2%)
Wrike	Stated	39/137 (28.5%)	21.6% to 36.5%	31/137 (22.6%)
Wrike	Not stated	73/137 (53.3%)	45.0% to 61.4%	82/137 (59.9%)
Wrike	Unknown	25/137 (18.2%)	12.7% to 25.6%	25/137 (18.2%)

Team review: in progress. The full vendor page table preserves every page URL, actual read date, snapshot hash, evidence offset and scope note. Category medians summarize these five pages; they are not a quality benchmark.

Reproducibility and review

The complete public data contains every criterion, supporting answer reference, exact character offset, source hash, engine, question, run, capture date, attached citation and scoped vendor page comparison. We publish summary tables here and the full data alongside the report.

The original answers are available from the source DOI. Every answer and shared source field in the 2,250 deposited rows matches the frozen research source. File and answer hashes identify the published source asset and the exact supporting passages. The study uses the scheduled category questions and the documented exclusions. The public release does not redistribute Perplexity answer quotations. Their original source identifiers, character offsets and quotation and answer hashes remain available for verification against the original deposit.

Semantic coding and dated page comparisons follow the published rules. Independent analyst review remains in progress. Every criterion remains labelled Team review: in progress until authentic returned decisions are validated against the exact evidence fingerprints. An unsigned workbook does not create verification.

Complete data and source verification

The accompanying files provide all observations, not only the displayed rows. records.csv records every scheduled category input and its exclusion status. criteria.csv contains every canonical criterion with count, base, interval and repeat counts. evidence.csv contains each supporting answer reference and exact source pointer. adjacency.csv contains explicit same answer vendor associations. vendor_pages.csv preserves each dated and scoped comparison. vendor_summaries.csv contains every vendor figure and its category median. study7-index.json joins these tables in one versioned contract.

Original answers and frozen source release. The source asset and answer hashes in the data allow exact verification against the original deposit. Character offsets use Unicode characters; SHA256 hashes use UTF8 text. The supplied public verifier recomputes counts, intervals and medians and checks the source references.

Product and corrections

Checklist Audit $490. Every figure comes from the published method, v1.1.
